ABN'S ANNUAL GENERAL MEMBERSHIP MEETING WILL BE HELD AT NAN

Calling all diplomates. ABN will be holding its annual General Membership Meeting at NAN on Friday, October 20th, at 12:45 pm, in the Blakely room of the Westin Hotel, San Juan Level, 3rd floor. All ABN diplomates are invited. Meet your Board of Directors, and hear what ABN has been up to over the past year. We hope to see you there!

UPDATE ON DISTINGUISHED MEMBER ACTIVITIES

Dr. Mac Horton and Dr. Pat Pimental, both Past-Presidents of ABN, represented the American College of Professional Neuropsychology (ACPN) at the 28th Annual Convention of the Association of Psychological Science (APS) held in Chicago, May 26-29, 2016. ACPN is an affiliate member of the APS and has had the honor of having representatives continually invited to present a whole day of workshops as part of the

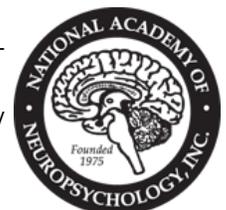

pre-convention offerings. The morning workshop was presented by Dr. Horton and the afternoon workshop was presented by Dr. Pimental. The workshops allowed students to ask questions and to dialogue with presenters after the presentations. The morning workshop by Dr. Horton was entitled "The Neuropsychology of Drug Abuse, Pathological Gambling, and Sex Addiction", which is a very timely topic considering a recent focus of attention in the news media on the overdose deaths of famous persons. The afternoon workshop was entitled "Introduction to Neuropsychological Assessment". Dr. Pimental shared some new case vignettes at the end of the presentation in the form of posters presented at national meetings, which served to illustrate the clinical utility of neuropsychological testing in both diagnosis and treatment and rehabilitation.

NATIONAL ACADEMY OF NEUROPSYCHOLOGY CONFERENCE SPOTLIGHT

Pat Pimental, PsyD and Renee Low, PhD will be featured presenters at the National Academy of Neuropsychology (NAN) annual conference (October 19-22, 2016) in Seattle, WA, co-chairing a session entitled: *Neuropsychology career trajectories: Recipes for success in networking and practice development*. In addition to Drs. Low and Pimental, Dr. Geoffrey Kanter and Dr. Rosemarie Scolaro Moser will also participate in the panel focusing on career trajectories, personal skills and attributes that are salient to the creative development of a practice, and medical specialty areas where neuropsychology services are essential for integration of patient care. This panel aims to offer insight to students and early career neuropsychologists the myriad of career paths available and will address topics including practice development, social networking, generating referrals, job functions and responsibilities, expectations and potential obstacles, and balancing life and work. We encourage all ABN members to attend and also to bring students, early career practitioners and other colleagues. We believe this session would benefit all in terms of networking and fostering a strong mentoring focus opportunity for ABN Diplomates.

2016 Elections are in Full Swing! Meet your Board of Director Candidates

The 2016 voting window is now open. We are pleased to announce that we have 4 well-qualified candidates for our 2 open Member at Large positions. Ballots will be delivered by Survey Monkey during the first week of July. If you are an active member (current on dues and Maintenance of Certification) and do not receive a ballot, please contact Dr. Thomas Bristow (ABN Treasurer), at TomBristow@abnbod.org, to verify that you are an active member current on dues and if so, to determine why you did not receive a ballot. If necessary, you may also request a paper ballot, for this election cycle only. In the meantime, please take a few moments to review the candidate statements provided by your nominees. The information is also posted at www.abn-bod.org. Click "News," then "Announcements."

Sean Brannon, PhD, ABN

My name is Sean Brannon and I'm asking for your vote for the position of Member at Large of the American Board of Professional Neuropsychology.

I am a forensic neuropsychologist and have been involved in criminal forensics for the past ten years. I work for the Department of State Hospitals in California. I am currently Chair and a founding member of my hospital's Bioethics Committee. The hospital serves over 1500 psychiatric inpatients whom are forensically committed for assessment and treatment. My specialty and research interests are in clinical supervision, TBI, neurodegenerative diseases, psychometrics and symptom validity assessment.

Last year, I completed ABN's course-work and mentoring to enable me to coach our candidates and to conduct oral examinations for the board. I have enjoyed serving the board and our membership and I know that there is much to accomplish in the years ahead.

I am a strong advocate of our nationally recognized professional boards and appreciate the dedication as well as the distinction that the board has earned. In the medical arena of which we are a vital part, board certification in one's specialty is an expectation and is dignified both professionally and financially. Even the most seasoned of experts via experience can benefit from frequent contact with other dedicated professionals.

I have observed first hand, the significant changes in our patient population over the recent years. As our Nation's average age rises, so does the number of patients who require our specialized services. The healthcare field in general, has been slow to respond to this rapidly growing need. Recently in California, Neuropsychologists were reinstated as a specialty for worker's compensation claimants, after a two-year battle in the legislature regarding whether neuropsychologists are expert specialists and should be paid as such. During that period, there were many psychologists who claimed to have neuropsychology experience and qualifications who advertised dubious credentials at best. Now the courts will have to decide whether those two years of assessments will be forever questioned, and which of those patients were provided the appropriate standard of care.

As a "Member at Large" on our board, I will vigorously strive to continue the hard work that has been done to promote our specialty and to protect the gains that have already been made towards making your ABN continue be one of the most respected and prestigious board certifications possible the field of Psychology. Thank you for your support.

Dr. Brannon attained his doctoral degree in Philosophy with a major of clinical psychology and a minor in neuropsychology from Loma Linda University in 2006. He completed one full time neuropsychology internship with Loma Linda Medical Center and one generalist internship with the Veteran's Administration. He then completed a post-doctoral fellowship in neuropsychology at Patton State Hospital. Dr. Brannon has worked as a clinician at Riverside County Family Services, California State University Student Services; has taught at the undergraduate, graduate and doctoral level on Neuroanatomy, Neuroimaging, Abnormal Psychology/Pathology, Health Psychology, Diagnostics and Statistics. He currently serves as faculty and clinical supervisor of doctoral candidates, fellows and pre-licensed forensic psychologists. He has presented several times on the topics of symptom validity testing, the management of aggressive behavior due to TBI and the diagnosis and treatment of psychiatric inpatients with brain injury. He is co-founder and current Chair of the Patton Hospital Bioethics Committee which serves a large contingent of patients and their care providers. He frequently provides expert testimony in capital crime cases, and performs forensic evaluations for the California Superior Court which involve possible brain dysfunction. Dr. Brannon is a member of the APA (Divisions 40 and 41), the International Neuropsychological Society and the National Academy of Neuropsychology.

Paula Cooper, PhD, ABN

In 2011, I obtained board certification from ABN and wished to give back to the board, so I hit the ground running by accepting an appointment and became the Work Sample Coordinator. In 2013, I was elected as Member-at-Large (MAL). I am currently at the end of a three-year term of service. As MAL, I am a member of the Executive Committee. Sitting on the Executive Committee has given me the opportunity to become directly involved with the administrative issues and has given me insight into the running of the organization as a whole.

Additionally, I serve as Chair of the Post-doctoral Programs Committee and I remain committed to neuropsychology from our newly minted Academy of the American Board of Professional Neuropsychology (AABN). My hope is that by serving on the ABN board, I can continue to shepherd the AABN so that it continues to prosper and remain on the cutting edge at all levels serving faculty, staff, and residents of the member programs. I would appreciate your vote so that my service to ABN and AABN would not be interrupted and I would be granted the opportunity to follow my

goals to completion.

Dr. Cooper is a 2004 graduate of Alliant International University/Fresno's APA accredited doctoral program in clinical psychology. She subsequently completed neuropsychological postdoctoral training under direction of Geoffrey Kanter, PhD at Comprehensive Med Psych Systems in Sarasota FL. She is currently on staff with Comprehensive Med Psych Systems and previously served as chief neuropsychologist with NeuroInternational Residential Brain Injury Program. Dr. Cooper currently chairs the Academy of the American Board of Professional Neuropsychology postdoctoral training consortium.

Connie Venhaus PhD, ABN

I became board-certified with ABN in 2014, after four years of full-time practice in neuropsychology. Like many of you, I

balance a full-time position with a small private practice on the side, and I am well-acquainted with the roles we juggle - clinician, clinical supervisor, consultant, and committee-member, just to name a few. My mentors and supervisors taught me early on that the way to repay their time and effort is to train, support, and advocate for our students and new professionals in the field. If elected, serving as a member-at-large is my way of "paying it forward."

While I share our profession's general concerns regarding reimbursement for neuropsychological testing and the use of neuropsychological tests by allied professionals not trained in our field, I am equally committed to supporting neuropsychology as the gold standard for evaluation of neurodevelopmental disorders, and to expanding opportunities for neuropsychology training, particularly in rural and underserved areas. Board certification in one's field should suggest that an individual exceeds the minimum standards of the profession. I would work to uphold this ideal, if elected. I currently serve as a work sample examiner for ABN.

To share a little about myself, I work for Arkansas Rehabilitation Services, a state agency that provides comprehensive vocational rehabilitation services to individuals with disabilities. As part of this position, I evaluate patients with neurologic conditions and psychiatric issues through an outpatient medical clinic and field offices around the state. I supervise master's level psychological examiners, and have supervised doctoral-level practicum students with interests in neuropsychology.

Dr. Venhaus is a graduate of Fielding Graduate University's APA accredited doctoral program in clinical psychology, completing her predoctoral internship with the Black Hills VA Healthcare System. She subsequently completed the postdoctoral certificate program in neuropsychology through Fielding Graduate University. She currently serves as Neuropsychologist with Arkansas Rehabilitation Services, Hot Springs National Park, AR and serves as a practicum supervisor for doctoral students with University of Central Arkansas. Previous positions include Ozark Counseling Services and Clinical Research Coordinator with Larned State Hospital.

Raphael Wald, PsyD, ABN

My name is Raphael (Raphi) Wald and I am writing in order to seek your vote for ABN Member at Large. I am an incumbent MAL. I have served in the past as a mentor for ABN applicants and as the work sample coordinator. Serving in these positions has provided me with familiarity with the board and the issues that are frequently dealt with.

I presently work as the lead neuropsychologist at the Louis and Anne Green Memory and Wellness Center at Florida Atlantic University (FAU). We are a state certified dementia clinic and adult day center providing comprehensive diagnostic evaluations, social work case management, cognitive rehabilitation and many other services. In addition to this position, I am also the team neuropsychologist for FAU athletics. We are a division 1A program with a football team (in addition to just about every other NCAA sport) so as you can imagine I see a great deal of sports concussions. I am committed to continuing to do everything in my power to help strengthen ABN. Please do not hesitate to contact me at raphealwald@gmail.com if you have any further questions for me.

Dr. Wald attained his doctoral degree in clinical psychology from the University of Hartford in 2009. Dr. Wald works with individuals of all ages and is experienced in all forms of therapy including group therapy, individual therapy, and neuropsychological assessments.

Dr. Wald specializes in treating clients who suffer from depression, anxiety, adjustment, and/or medical issues. He has worked as a clinician at Harvard – Beth Israel Deaconess Medical Center in Boston, MA; The University of Connecticut Health Center and the Veteran’s Affairs hospital in Newington, CT and conducted research for a number of years at Tufts Medical Center in Boston. He currently serves as faculty member and lead neuropsychologist with Florida Atlantic University-Memory and Wellness Center.

He has been published as a first author in the Journal of Experimental and Clinical Psychopharmacology, and has published a book focusing on the causes and treatment of Obsessive Compulsive Disorder. Dr. Wald is a member of the American Psychological Association, Florida Psychological Association, and National Academy of Neuropsychology.

Please pardon our growing pains

This election cycle marks ABN’s transition from paper to electronic ballots for nominations and elections to the ABN Board. Our first-ever electronic nomination ballots for the 2016 election cycle went out in March. When reviewing the process after the close of the nomination window, we realized that ballots were inadvertently sent to inactive members who were in fact not eligible to vote. This issue has been corrected. If you are eligible to vote (an active diplomate current on dues) but did not receive a nomination ballot, please contact ABN’s treasurer, Dr. Tom Bristow at TomBristow@abnbod.org so that we can be sure that you get ballots moving forward. Please also be aware that you must be current on dues and MOC in order to be eligible receive a ballot, and to vote.

Welcome new diplomates...

On behalf of the board of directors, it is our great pleasure to introduce our 3 newest diplomates, each of whom successfully completed oral examinations offered in Columbus OH in May 2016. We extend a warm ABN welcome to each of you, and thank you for your willingness to become involved in ABN activities.

Joseph Audie Black, PhD, ABN

Dr. J. Audie Black is a 2013 graduate of Michigan State University, from their APA-accredited, scientist-practitioner program. He subsequently completed a pre-doctoral internship at Allegheny General Hospital, Pittsburg PA. He then completed the AABN accredited postdoctoral neuropsychology fellowship at Allegheny General Hospital under the direction of Glen Getz, PhD, ABN, Fellowship Training Director, and Michael Franzen, PhD, Chief of Neuropsychology. He is currently on staff with the Department of Psychiatry at Allegheny General Hospital and in private practice providing diagnostic assessments and integrative solutions-focused treatment for adults with complex medical and psychiatric problems across the lifespan. He primarily provides assessments to older adults who present with

dementia rule-outs, strokes, head injuries, and movement disorders. He currently teaches psychiatry residents and fellows, psychology graduate students, pre-doctoral psychology interns, and Neuropsychology post-doctoral fellows at Allegheny General Hospital and previously taught graduate level courses at Chatham University and was an undergraduate instructor at Michigan State University.

Michael DeBellis, PsyD, ABN

Dr. DeBellis completed his undergraduate studies at The University of Akron and is a 2008 graduate of the clinical psychology doctoral program at The Wright Institute, in Berkeley California. He completed his pre-doctoral internship at UC Davis Medical Center with the Department of Physical Medicine and Rehabilitation, and provided neuro-psychological assessment and cognitive rehabilitation for six years at the Marin Neuropsychology Center. He lectures at U.C. Davis Medical Center as well as Sonoma State University, teaching functional neuroanatomy, physiological psychology, cognitive psychology and personality. He currently maintains practices in Half Moon Bay CA and Richmond CA., specializing in treatment of patients with traumatic brain injury, dementia, stroke and other acquired brain injury.

Elise Ginsburg, PhD, ABN

Dr. Ginsburg earned her Doctorate from the University of Calgary (1996), subsequently completing the post-doctoral certificate program in Clinical Neuropsychology with Fielding Graduate University, under the supervision of Dr. Arnold Purisch. She is currently co-owner of Colorado Neuropsychological Services, providing cognitive rehabilitation and therapy to individuals and families coping with the consequences of acquired brain injury. Before practicing with Colorado Neuropsychology Services, LLC, Dr. Ginsburg worked with the Acquired Brain Injury Team at the Nova Scotia Rehabilitation Centre and in private practice in Boulder, Colorado and Calgary, Canada. Dr. Ginsburg hails from Connecticut, and has lived for many years in several different provinces in Canada. Her interests are varied, spanning from physical fitness to travelling to art/photography/reading.

President's Corner—Karen Wilhelm

Greetings Fellow ABN Members

The first half of 2016 has proven to be very busy for ABN. I am pleased to report that our scheduled CRSPPP re-application has been submitted, and is currently under review. Approval of our re-application will allow us to continue to list our ABN credential after our names in the APA directory. Your Board of Directors worked very hard on this application, and I am hopeful for a positive result. We will likely not hear the results until December, but as soon as ABN is notified of the result, we will make an announcement to the membership.

Other activities have included ongoing improvements to ABN's data management system, as well as other projects and activities described elsewhere in this newsletter. We are also moving forward with our Maintenance of Certification revisions,

though at a slower pace than initially anticipated. Additionally, please be on the lookout in coming weeks for information about proposed revisions to ABN's bylaws. The Board of Directors will assemble its recommendations, and submit them to the membership for approval by vote.

NAN is fast approaching, and as usual, ABN will have a strong presence. We will have an ABN booth in the exhibit hall, and invite everyone to stop by to

members of your Board, or to spend some time behind the booth with us, greeting potential applicants and answering questions. We'll have a few giveaways as well. The ABN General Membership Meeting will be held at NAN, time/date still to be determined. Stay tuned for updates. Also, Drs. Renee Low and Pat Pimental will be leading a panel discussion on networking and practice development. This session is scheduled for 1 pm Wednesday afternoon. Please consider attending. It looks to be a very interesting and informative session, and I would like to have a good ABN turnout.

Finally, as always, ABN is in need of volunteers. We are an organization run on a strictly volunteer basis, for and by our members. Please consider giving back to the organization by helping out with Board activities. We are particularly in need of individuals interested in training to become work sample reviewers, and are in need of volunteers to sit on various ABN committees. Currently, the Bylaws Committee and the Policy and Planning Committee have openings. We would also like to reactivate our Diversity committee. If you would like to volunteer for a committee, or to train to become an examiner, please contact me directly at KarenLynneWilhelm@gmail.com. Your board is a welcoming and collegial group, and your participation will be greatly appreciated.

Warm Regards,

Karen L. Wilhelm, PhD, ABN

ACPN Activities—Maintenance of Certification Requirement Revisions

ABN's committee roles include to keep current our Maintenance of Certification criteria. We are preparing our newest revision of criteria for piloting, and eventual implementation. ABN has had MOC criteria for many years, but recognizes that interval revisions are needed to keep pace with evolving standards in the field. The goal is to have MOC criteria that are relevant and current with standards in the field, but not so complex that they place an undue burden on our members. Stay tuned for further updates!

Meet our team – ABN Examination Committee

Our dedicated and multitalented President-Elect, **Dr. Renee Low** is stepping in to assume interim leadership of the **ABN Examination Committee**. She also serves as the **Written Examination Coordinator**. Dr. Low is a board-certified clinical neuropsychologist who is fellowship trained in neuropsychology with University of California Davis Medical Center. She specializes in diagnosis and treatment of sports concussions, and is currently on staff with Swedish Medical Center in Seattle WA. Dr. Low is ABN's President Elect, and will begin her term as ABN Board President in 2017.

Stepping in to assume leadership as incoming **Work Sample Examination Coordinator**, we are delighted to welcome **Robert Perna, RN, BSN, PhD**; Clinical Neuropsychologist at The Institute of Rehabilitation Research, Memorial Hermann Challenge Program in Houston TX. With many years of experience in brain injury rehabilitation and in the mentoring of the next generation of neuropsychologists, Dr. Perna has previously served on the ABN Board of Directors. We consider ourselves fortunate indeed to welcome his back to the ABN leadership team.

Although we were unable to locate a picture of Dr. Wilhelm wearing two hats for this issue, more often than not we are used to seeing ABN Board President **Dr. Karen Wilhelm** juggling more than one set of duties for the board. For the Examination Committee, Dr. Wilhelm serves as **Oral Examinations Coordinator**, as well as **Mentors and Examiners Coordinator**. Dr. Wilhelm strives to maintain a balance between professional rigor and a welcoming, collegial atmosphere to the oral examination process, and is responsible for training of the oral examiner team. Dr. Wilhelm is a board certified neuropsychologist with Wake Medical Center in Raleigh NC.

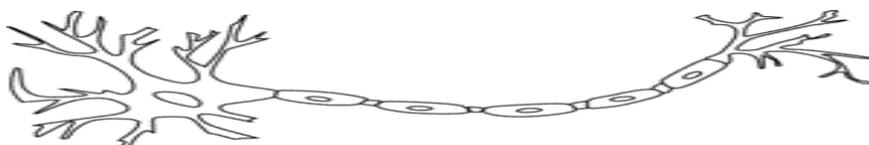

Rounding out the Examination Committee team in the role of **Applications Coordinator** is **Dr. Roger Riss**. Dr. Riss wears many hats as well, also serving as ABN's Secretary, Newsletter Editor and Chair of the Policy and Planning Committee. As "first contact" for students and prospective applicants, it is Dr. Riss' role to maintain ABN's tradition as a "welcoming board." Dr. Riss guides prospective candidates through a rigorous vetting process, while simultaneously offering support, encouragement and a personal contact point with ABN. Dr. Riss is a board certified neuropsychologist with Madonna Rehabilitation Hospital in Lincoln NE, and co-director of training for their AABN affiliated postdoctoral fellowship.

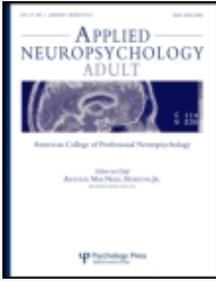

Dr. Jeffrey Madden is "passing the baton" from his role as Chair of the ABN Examination Committee after a distinguished tenure spanning 2011-2016. While many who have gone through the board certification examination process in recent years have had the privilege of meeting Dr. Madden, they no doubt were unaware that the careful planning, organization and attention to the needs of examinees which they experienced could largely be credited to Dr. Madden's leadership. We wish to express our sincere thanks to Dr. Madden and wish to express our sincere thanks to Dr. Madden for his dedication, remarkable energies and important work in service to ABN.

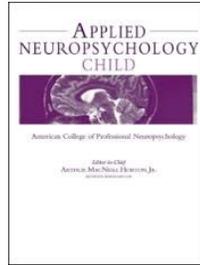

We would like to express our thanks to board member **Rafael Wald, PhD** for his service and leadership on the Examination Committee, as Work Sample Examination Coordinator. While we understand Raphi's decision to step down, and his decision to prioritize time with his family, his contributions to the examination committee will be sorely missed. We look forward to his continuing contributions in his role as member at large of the ABN Board of Directors.

ABN's Official Journals, Applied Neuropsychology, under the leadership of Editor-in-Chief, Dr. Arthur MacNeil Horton, Jr., include the Adult and Child companion publications which have been highly rated and recognized. All ABN members in good standing have received the journals, in both print

and by electronic access, as a benefit included in their annual ABN dues. Comparable access is part of ACPN Affiliate Member status. Please encourage students and non-ABN colleagues to join ACPN. Your organization has made the journals available for nominal annual costs of \$75 for professionals and \$35 for students.

Forward the link!

<http://acpn.myshopify.com/pages/affiliate-membership>

The Academy of the

American Board of Professional Neuropsychology (AABN) is an organization whose member programs offer postdoctoral training in Clinical Neuropsychology.

In January 2014, the **Academy of the American Board of Professional Neuropsychology (AABN)**, a division of the ABN, began offering the opportunity for post-doctoral neuropsychology training programs to become a recognized training site. This innovative development emerged in response to: (a) the lack of adequate formal post-doctoral recognized training programs across the United States in comparison to the high number of graduates interested in formal, quality training programs, and (b) the fact that other agencies recognizing post-doctoral training programs require the Director of Training to have obtained board certification from only one board certifying agency (ABPP). These circumstances unfairly limit the programs available in the United States to the great detriment of large numbers of graduates seeking quality, recognized formal post-doctoral neuropsychology training.

The **AABN** was developed and implemented to strengthen the field of clinical neuropsychology by setting standards for post-doctoral training, to ultimately encourage board certification (without discrimination to any board) and thereby foster education and confidence in the public in the field of clinical neuropsychology.

ABN BOARD OF DIRECTORS:

PRESIDENT	Karen L. Wilhelm, Ph.D.	11-15 to 11-17
